

Get a crush on Python

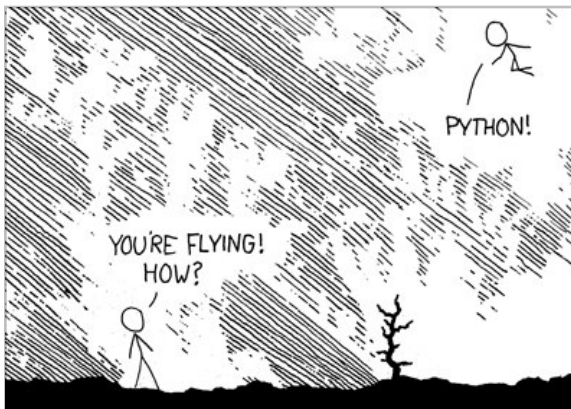

Become a part of something great

Tech giants like Google, Dropbox or NASA have already chosen Python. Now imagine your job opportunities as a pythonista.

Do more with less

Computer vision, computational physics, language processing, big data, html scraping, data extraction, web development – you name it – will be at your command.

Look what others are saying

"I have a degree in Electrical/ Electronics Engineering and I currently work as a Software QA Analyst. I am looking to use Python for test automation."

– Tomiwa, Nigeria

"I started to solve one problem, and couldn't stop, lol..."

– Idelfonzo, Venezuela

"I feel that your course don't assume that people are idiots, like it sometimes happens in the other online courses."

– Jacek, Poland
